

IN SERIES WITH WIRTHWEIN

As an expert for innovative plastics processing we have been fulfilling individual customer requests since 1949.

With 23 companies in Europe, Asia and the USA we are close to our customers worldwide. The Wirthwein-Group employs more than 3,650 people in the business units of Automotive, Railway, Electrical and Home Appliances Industries, Medical Engineering and Interiors.

Wirthwein has always been an owner-operated family business. This is why we are independent and dynamic. We cultivate long-term relationships in the market. We are a reliable and stable partner.

We apply state-of-the-art technologies on the spot, where our customers need the components and modules, locally anchored throughout the world.

WIRTHWEIN-GROUP

Company profile and sites in the USA

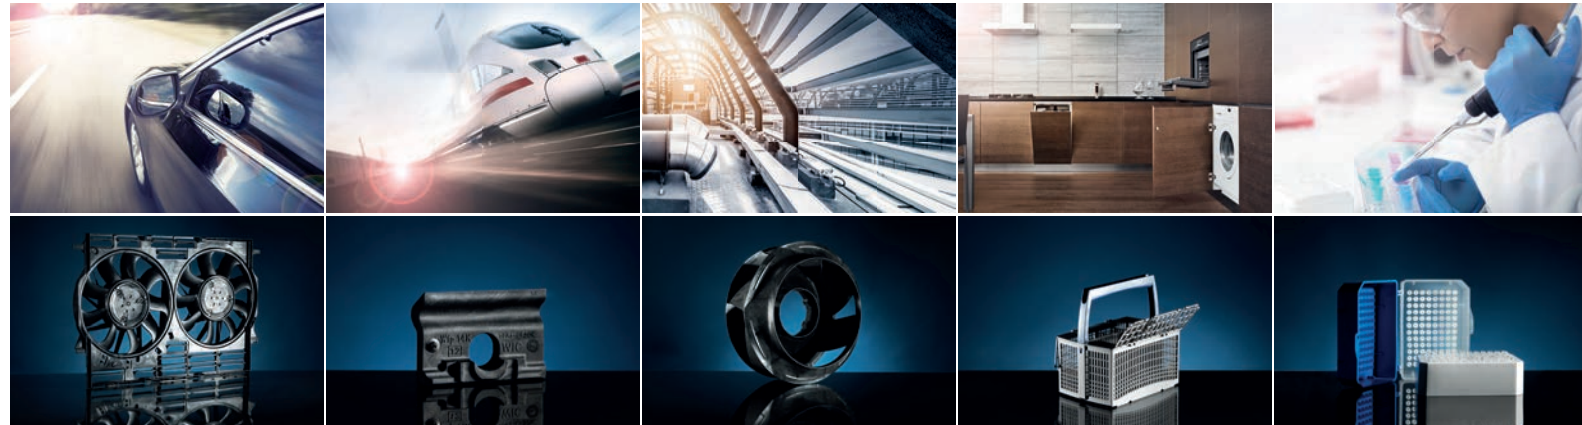

GLOBAL SYSTEM PARTNER

We are a leading manufacturer of plastic-based components, assemblies and systems for innovative key industries.

OUR COMPETENCES

- Our **global project teams** plan, manage and control the entire value stream of your product proactively as we focus on integrated processes and interdepartmental coordination.
- With three of our own **tool making** plants, state-of-the-art milling- and EDM technologies and the synergies of a system supplier we design, construct and produce the injection molds for your technical components and visible parts.
- We provide you with a unique comprehensive package of **thermoplastic processing**: interlinked injection molding, extrusion blow molding, fully automated insert technologies and, if required, maximum purity in class 7 clean rooms. We see our strengths in the production of technically advanced large components.
- Our **surface refinements** increase the value of your plastic components both in terms of form and function.
- We **assemble** individual plastic components to complex assemblies and systems in a process-reliable way.
- Our certified **quality management** system encompasses the whole process chain of all Wirthwein plants worldwide. Our US sites are certified according to: IATF 16949, ISO 9001 & UL.
- We develop custom-fit and comprehensive **logistics** concepts – from production up to the place of demand.
